Dance workshops

Swimming Galas

Forest School sessions – training two members of staff

Lunch time activities

Impact on Pupil's PE and Sports Participation and Attainment

The profile of PE and Sport within our school has been raised enabling us to develop a clearer vision. Our PE lead has undertaken Level 5 Training in Leading PE and is working to develop CPD for other members of staff. Pupils are working good progress in PE in all year groups as tracked through our internal system. There has been a greater uptake in pupils taking part in extra-curricular sporting activities. As a school we have competed in many local events. We received a Silver Games Mark Award for 2015-2016 improving on our previous Bronze Awards. Pupils have learned about Healthy Eating through cookery classes with our cook and Teaching Assistants. Pupils have taken part in Change for Life PE sessions, learning about how to keep fit and healthy.

Sustainability

Over the next twelve months we will continue to develop our whole school vision and strategy for PE and Sport in readiness for 2020 when the funding will cease. Our action plans will include staff awareness of healthy living, keeping fit and developing skills to undertake a wide range of sporting activities through further CPD. This succession planning will lead to greater opportunities for pupils therefore increasing their skills and knowledge to a greater depth. As a school we are developing nurture sessions for our pupils through both Forest School and Sporting activities. We will investigate working in closer partnership with other schools within our MAT to provide all our pupils with as wide a sporting experience as possible.

Date of next review: March 2018
